Sight Words: For the Grown-Up

Words on this page: the, a, I, to, and, is, you, it, in, we.

Read it: point under the word and say it together, then the student says it alone. Write it: say each letter while writing. Circle it: the student reads every word in the row out loud and circles only the target.

Easier: one row a day, or trace the word in highlighter first. Harder: cover the word and write it from memory, then check.

Want your own words? Type them after a colon, for example "sight word practice: the, and, see, can".
